

Declaration of Developing Kumamoto with Foreigners

We, the industrial institutes, educational institutes, and government offices of Kumamoto, will work as one to create an environment in which foreigners are glad to have come and can easily live and work. We will also aim to develop the region with foreigners and make it one which they will choose above any other region in Japan.

In order to realize such a region,

- We will strive to provide massive support to foreigners so that they can understand the rules of Japanese life and to establish a comfortable labor environment which takes diversity into consideration.
- We will strive to provide foreigners opportunities to learn Japanese, deeply understand the culture and customs of Kumamoto, and to work on achieving their dreams.
- We will strive to create opportunities for foreigners to participate in their local community.
- We will strive to counsel foreigners on any matters concerning their daily lives.
